BLS 510-520 SERIES

DISPOSABLE VERTICAL FILTERING FACEPIECES

BLS 510-520 series filtering facepieces offer effective protection of the respiratory tract in those environments where the wearer is exposed to non-volatile solid and/or liquid particles (dust, fumes, mists).

SINGLE PACKED 2-PANEL VERTICAL DESIGN

The filtering facepiece adapts to all kinds of faces with different sizes and shapes, it is comfortable to wear and easy to store when not worn. The individual hygienic packaging also protects the filtering facepiece from any contamination before use, allowing practical storage and distribution in the workplace.

INTERNAL NOSE CLIP

The nose clip is placed internally between the layers of the filtering material and adapts perfectly to the profile of the nose and eyes ensuring good visibility and great compatibility with glasses.

SLIDING OR WELDED HEAD ELASTICS

They facilitate the correct positioning of the disposable facepiece on the user's face for optimal stability and comfort.

EXHALATION VALVE

Available with or without lateral exhalation valve.

FILTRATION REQUIREMENTS

BLS adheres to much stricter criteria in its quality control processes than those dictated by EN 149:2009 standard.

CERTIFICATION

BLS filtering facepieces are:

- Certified according to European Regulation 2016/425 (Personal Protective Equipments)
- Certified as PPE of III category, in presumption of conformity to harmonized standard EN 149:2001+A1:2009
- Certified and controlled according to Annex D by Italcert S.r.l. (Notified Body n°0426)
- CE marked

BLS management system is ISO 9001 certified.

SELECTION GUIDE

FLAT

- It prevents internal mask contamination, in direct contact with the face, before and after use
- It can be distributed through vending machines
- Ideal for intermittent use, it does not get ruined if kept in a pocket

NO VALVE_ BLS 513 / BLS 522

- Exhalation barrier, it protects the environment from the wearer
- Ideal in the food in dusty and all working environments where potential contamination by the wearer must be

VALVE_ BLS 513V / BLS 522V

- It allows to reduce the respiratory resistance, guaranteeing a higher comfort of the product

SLIDING ELASTICS_ BLS 513 / BLS 513V

- They allow tension of the elastics to perfectly be distributed over the nape of the neck to ensure a perfect fit on all types of faces

WELDED ELASTICS_ BLS 522 / BLS 522V

- They are ultrasonically welded to avoid all exposed metal parts
